

## Technical Data Sheet

### Phase Change Material (PCM)

EVSP205A-AL is a phase change thermal interface sheet having a softening temperature of 50-65 . The liquid phase of the material can fill interface irregularities with much higher efficiency than traditional gap filler. On the other hand, EVSP205A-AL phase change thermal interface sheet is a solid at room temperature and can be handled easily during installation.

### Material Properties

- Excellent thermal conductivity in the vertical z-plane
- Strong interface wetting ability, long-term reliable thermal conductivity
- Good flexibility & compression ratio
- Effectively reduce the coating thickness of the material between the interface
- Flexible and can be easily converted to custom sizes
- Thin and lightweight

### Applications

- ✓ Semiconductor device testing, - CPU, GPU, MCM
- ✓ Mobile phones & PC tablets, PCs, Servers, and cloud storage
- ✓ PDP, LED devices, IGBT Modules
- ✓ Optical communications equipment, medical equipment
- ✓ High frequency microprocessor Integrated Chip
